CAPABILITY STATEMENT

SOFTWARE QUALITY ASSURANCE & TESTING

Spencer Technology Solutions, LLC is a Service-Disabled Veteran-Owned Small Business specializing in software quality assurance, testing, verification and validation (V&V), and IV&V.

We help government agencies and prime contractors identify defects earlier, verify requirements, validate user workflows, and reduce software release risk. Our cybersecurity, DevSecOps, and Agile delivery experience supports dependable releases.

COMPANY OVERVIEW

STS brings more than 25 years of founder experience in software testing, QA management, cybersecurity, and Agile delivery.

We combine software quality expertise with leadership of integrated teams of developers, testers, Scrum Masters, and Product Owners.

CORE COMPETENCIES

SOFTWARE QA AND TESTING

- Test planning and strategy
- Manual testing and test automation
- Functional, integration and regression testing
- Performance, load and user acceptance testing (UAT)
- Accessibility testing and defect management

VERIFICATION AND VALIDATION

- Requirements review and traceability
- Verification against specifications
- Acceptance criteria and test evidence
- Validation of user workflows
- Integration and system validation

INDEPENDENT VERIFICATION AND VALIDATION (IV&V)

- Independent software and process review
- Requirements and test coverage
- Quality and delivery risk assessment
- Findings and recommendations
- Independence from development

SPECIALIZED SOFTWARE TESTING

- Accessibility and Section 508 testing
- Security-focused testing
- CI/CD and continuous testing
- Risk-based testing and release readiness
- Agile and DevSecOps QA

REPRESENTATIVE EXPERIENCE

FOUNDER LEADERSHIP AT CISCO

Led the business group's waterfall-to-Agile transformation and approximately five global teams of developers, testers, Scrum Masters, and Product Owners. The group worked on Snort and the Next Generation Firewall.

CYDRA SOCIAL

- STS-owned content operations platform
- AI-assisted content workflows
- Integration and release testing

CYDRA LAW

- STS-owned legal operations platform
- Connected intake and matter workflows
- Workflow validation and testing

PRIME CONTRACTOR SUPPORT

STS supports prime contractors with test planning, test execution, requirements traceability, V&V, IV&V assessments, accessibility testing, and software quality risk evaluation.

DIFFERENTIATORS

- ✓ Service-Disabled Veteran-Owned Small Business
- ✓ 25+ years of founder software experience
- ✓ Career progression from testing to QA leadership
- ✓ Led Cisco business group's Agile transformation
- ✓ Led approximately five global integrated teams
- ✓ Owns CYDRA Social and CYDRA Law products
- ✓ Cybersecurity software delivery experience
