CAPABILITY STATEMENT

SECURE SOFTWARE ENGINEERING THAT DRIVES MISSION SUCCESS

Spencer Technology Solutions, LLC is a Service-Disabled Veteran-Owned Small Business (SDVOB) specializing in secure software engineering, application modernization, cloud technologies, DevSecOps, quality assurance, cybersecurity, and AI-enabled workflow automation.

We help government agencies and prime contractors modernize mission-critical systems by designing, developing, testing, securing, and maintaining scalable software solutions that improve operational efficiency, cybersecurity, and mission performance.

COMPANY OVERVIEW

With more than 25 years of leadership in software engineering, cybersecurity, and Agile delivery, Spencer Technology Solutions helps government agencies and prime contractors modernize systems, enhance security, and accelerate mission outcomes. Our solutions are secure-by-design, scalable, and built to meet federal compliance requirements.

CORE COMPETENCIES

SOFTWARE ENGINEERING

- Custom Application Development
- Legacy Modernization
- Enterprise Applications
- API Development & Systems Integration
- Secure SDLC

CLOUD & DEVSECOPS

- AWS | Azure | Google Cloud
- CI/CD Pipelines
- Infrastructure as Code
- Containerization (Docker, Kubernetes)
- DevSecOps Best Practices

QUALITY ASSURANCE

- Automated Testing
- Manual Testing
- Regression Testing
- Performance & Load Testing
- Section 508 Accessibility Testing

ARTIFICIAL INTELLIGENCE

- AI Workflow Automation
- Intelligent Document Processing
- Business Process Automation
- Decision Support Solutions
- Operational Intelligence

CYBERSECURITY

- Secure Software Development
- Identity & Access Management
- Risk Management Framework (RMF)
- NIST Cybersecurity Framework
- Secure Coding Practices

AGILE DELIVERY

- Agile Methodologies (Scrum, Kanban, SAFe)
- DevSecOps Integration
- Continuous Improvement
- Product & Project Management

REPRESENTATIVE EXPERIENCE

**CYDRA
SOCIAL**

CYDRA SOCIAL – COMMERCIAL SaaS PLATFORM

- AI-powered platform for social media operations
- AI integration, workflow automation, and intelligent scheduling
- Cloud-native architecture with multi-tenant scalability
- DevSecOps, automated testing, and continuous delivery

**CYDRA
LAW**

CYDRA LAW – COMMERCIAL SaaS PLATFORM

- AI-powered legal operations and case management platform
- AI-assisted document processing, workflow automation, and real-time collaboration
- Secure cloud architecture with enterprise-grade security
- DevSecOps, automated QA, and continuous improvement

PRIME CONTRACTOR SUPPORT

Spencer Technology Solutions provides scalable software engineering support to prime contractors through application modernization, cloud engineering, DevSecOps, quality assurance, cybersecurity, AI-enabled automation, and Agile delivery. We integrate seamlessly with existing teams to strengthen proposal efforts and project execution.

DIFFERENTIATORS

- ✓ Service-Disabled Veteran-Owned Small Business (SDVOB)
- ✓ More than 25 Years of Engineering Leadership
- ✓ Former Cisco Cybersecurity Leadership
- ✓ Proven Commercial SaaS Product Experience
- ✓ Secure-by-Design Software Engineering
- ✓ Cloud, DevSecOps & Agile Expertise
- ✓ AI-Enabled Automation & Innovation
- ✓ Responsive, Reliable & Easy to Work With
